

TWO GOOD STRIKES IN ONE DAY

Butte and Belcher Are Now Credited With Good Ore Bodies

RACE RIOTS RAGING IN WINDY CITY

(City Associated Press.)
CHICAGO, July 28.—Race troubles were renewed today in Chicago's black belt. A negro fired several shots at a wagonload of white workmen being taken to a South Side factory. A dozen negroes rushed to his assistance when the whites attempted to disarm him. The police quelled the disturbance with no injury. Two negroes were killed and fifty or more whites and blacks, including four patrolmen, were injured in the rioting. It is believed that the trouble started yesterday on the beach where whites and blacks were accustomed to swim in Lake Michigan. An imaginary line is supposed to separate the two swimming beaches. A negro boy is supposed to have crossed the boundary when white boys stoned him. One negro was knocked in the water and drowned and a general fight developed.

Trouble broke out near the center of the colored district after the beach rioting was quelled. Several shots were fired. The police dispersed the crowds in the thickly populated colored districts. Then whites from other parts of the city began dragging negroes from street cars and beat them severely in several instances. Many shots were fired during the night. The police answered two riot calls early today but their services were not required in either instance.

MAKING HISTORY WITH TWO NEW OREBODIES

It was currently reported on the streets this morning that the Butte Divide and the Belcher Divide had cut good looking ore bodies that carry better than commercial values. In the absence of the engineers' reports could not be verified but, from the action of the market, there was not much left for doubt. The Butte was the scene of another sensational report three weeks ago when it announced that a rich surface ledge on the Belcher ran directly into the Butte and that croppings on the estate of the Butte had yielded good assays. Manager George Reading did some preliminary trenching at that time and concluded not to waste any more time in that direction as he was busy getting in his complete equipment of machinery which was installed a week later. The intention of the engineer in charge was to keep sinking to depth before beginning lateral work which would serve to prove up the surface ledge. It showed the usual enrichment at depth. Whether it was this ledge or not that was cut yesterday could not be learned but heavy buying orders were sent in this morning which caused the stock to open at

29, rise to 22 and close at the opening price on sales 88,500 shares. Revert was influenced by the Butte and 45 was bid freely during the day for large blocks without eliciting an offer.

In the Belcher there are several novel conditions either one of which might be responsible for the advance due to the report that the company had cut the main ore shoot of the district. From the main shaft at a depth of 200 feet a crosscut was extended and at last accounts the face had only 12 feet to go to catch the vein. The strike is said to have been made on the night shift and it was currently reported that values were better than \$40. Recently the company opened 400 feet of workings from the old Hearst shaft which was fitted only last week with ladders permitting exploration. The values in these workings are almost equal to commercial ore which was quite satisfactory considering the lateral was at a depth of 60 feet. The stock advanced from 76 at the close last night to 79 today and closed at 75 for want of authentic information. The improvement brought out no offerings.

MAY QUALIFY PEACE TREATY

(City Associated Press.)
WASHINGTON, July 28.—Expectation that the president will make a statement soon and clarify the Shantung and reservations issues, marked the beginning of the tenth week of the senate debate on the peace treaty. There is no authoritative indication of the stand the president will take but a Republican senator who has seen him, believes it would not be an uncompromising one for unreserved ratification. Replying to a letter from Senator Hale asking for opinion on the number of reservations to the league of nations covenant, Charles Evans Hughes said "I think the prudent course is to enter the proposed league with reservations of reasonable character adequate to our security." He said "there is plain need for the league."
